

# CO2 Compensation FRACHT group

The FRACHT group as worldwide Logistics provider always strives to achieve the most positive impact in all fields of their activities – and therefore in this respect also in the sustainability of the environment.

Since 2010 the FRACHT group can offer you the unique possibility to handle your transports on all carriers on a CO2 - neutral basis.

In co-operation with South Pole Carbon Asset Management Ltd. we are offering a compensation scheme, that is directly linked to comprehensible and traceable climate projects.

## Basic facts:

Climate change is the most challenging topic of the 21st century.

We would like to offer you to be part of our solution and suggest concrete steps to your company and your customers in order to compensate for the CO2 emissions caused by transportation.

The FRACHT group provides this solution basing on the easy-to-handle carbon webshop of South Pole. This includes a sophisticated carbon footprint calculator that provides you very fast with the compensation amount necessary to neutralize of your emissions.

The CO2-program of FRACHT and South Pole is working under the regulations of UN Gold Standard.

## Two ways of emission compensation via FRACHT AG

### ➤ Via web-shop - [www.fracht.com](http://www.fracht.com)

At FRACHT group we make it easy for our customers to calculate their emission compensation via the integrated CO2 calculator on our homepage, with the direct compensation opportunity via web-shop-solution of South Pole carbon (incl. printing of your own CO2 emission certificate)

### ➤ Via transport order to FRACHT AG

If you would like to know the amount corresponding your actual shipment or your actual request, please ask us about the CO2-compensation amount of your transport order.

By release of your final transport order you may decide if you would like to get the compensation (incl. the compensation certificate issued on your project or transport order.

Further you have the opportunity to cover all the CO2 emissions of your shipments on a monthly basis (incl. the CO2-compensation certificate).

### Offset Your Carbon Footprint Now

Why offset with us?

Start to offset emissions by selecting a category:

Freight Tons CO<sub>2</sub> Cart

Home Calculation Offset Payment Certificate

#### Welcome to our Carbon Footprint Calculator and Offset Shop

This carbon application is brought to you in cooperation with leading carbon offsets developer South Pole. Please start by choosing a category above, and experience real carbon neutrality you can trust.

Offset your carbon footprint with transparent, real emission reductions fitting your needs and preferences:

- Choose from several high quality offsetting projects (instead of opaque portfolios).
- Achieve real climate neutrality now with our already verified credits (instead of a promise for future investments).
- Get a maximum emission reduction per invested capital (instead of paying high intermediary and marketing cost).
- Receive your detailed footprinting report at no extra cost (instead of just guessing how your footprint has been calculated).

South Pole offers proprietary high quality projects only, developed against the strictest international standards, e.g. The Gold Standard, VCS, CCBS. South Pole was elected Best Project Developer in Environmental Finance's Voluntary Carbon Markets survey 2011.

Check the detailed facts provided with the specific projects! In addition, and at no extra cost, you get a footprinting report based on your data. You can see an example certificate and an example footprinting report by clicking on the icons:

Certificate Report

Your information is processed using the latest security technologies, and will not be transferred to third parties (check our Terms and Conditions for details).

We are looking forward to the challenge of offering you the most economical and ecological transport for your cargo including the possibility to compensate the emissions through South Pole.

Please let us know your needs and get in contact with your local FRACHT Branch to learn more about the CO2 emission topic.
